

GENERAL FABRICATIONS

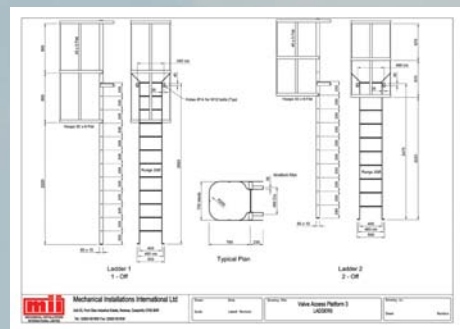

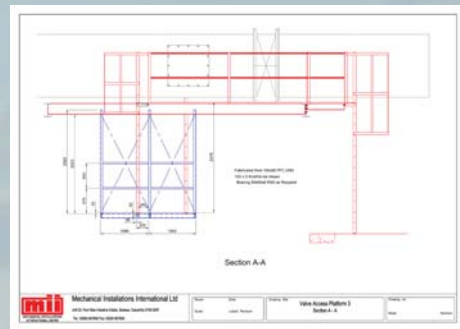

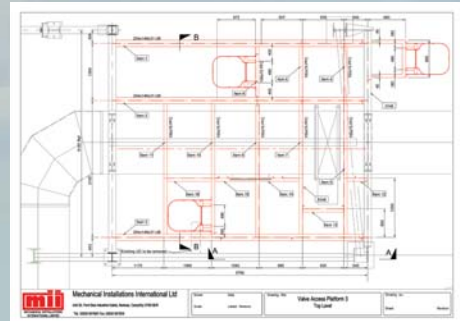

MII have fully equipped purpose-built workshop facilities based in Bedwas, Caerphilly with good access to the M4 corridor and thus a link to all major motorways across the UK. We pride ourselves on offering a high quality, cost efficient service. Large bays each housing their own overhead gantry crane enable us to manage a broad range of product sizes and complexities. Our adjacent building houses a stainless steel bay, along with a large yard with plenty of room to manufacture & store clients' batch requirements before shipping & installation.

Bedwas Facility

With fully qualified welding personnel coded to suit project & customers' requirements, a comprehensive quality system, complete welding procedures and full time welding inspector, our facility offers a one-stop-shop for your bespoke or production fabrication requirements.

- Centralised Head Office and fabrication workshops.
- Approximately 30,000 square feet of workshop area complete with overhead gantry cranes.
- Large yard area for storage of plant, equipment and product.
- Fabrication facility for structural steelwork, pipework, HP header manufacture & any bespoke customer requirements (large or small).
- Dedicated stainless steel shop.
- Fully trained quality workforce that has the ability to transfer to site as and when required in support of client installations (approximately 50+personnel).
- Off-site facility which will allow pre-shutdown preparation for plant outages & project works.
- All managers and engineers are based in one location enabling improved communication and response to the customers.
- Electrical & design facilities available at Bedwas to support customer/project needs.
- Industrial building refurbishment and repairs.
